

GABION MESH BASKETS

GABION MESH BASKETS ARE USED IN GEOTECHNICAL, LANDSCAPING, CIVIL ENGINEERING AND DIY PROJECTS WHERE A STONE RETAINING WALL IS REQUIRED FOR DECORATIVE OR RETAINING WALL APPLICATIONS.

GALFAN GABION BASKETS ARE MANUFACTURED FROM 3MM, 4MM OR 5MM DIA. STEEL WIRE, AND SUPPLIED WITH A 3" INCH / 75MM SQUARE MESH HOLE. THE CLASS A GALFAN COATING IS SUPERIOR TO GALVANISATION AS IT'S AN ALLOY OF ZINC / ALUMINIUM THAT PROTECTS THE STEEL WIRE FROM CORROSION / RUST. ANGULAR STONE SHOULD BE USED IN THE REGION OF 100MM UP TO 200MM.

EACH GABION IS SUPPLIED WITH THE 6 TO 7 WIRE MESH PANELS PER GABION CAGE, BRACING WIRE AND EITHER CLIPS OR HELICOILS FOR FIXING THE GABIONS.

WE ALSO SUPPLY THE GABION MESH PANELS ON THEIR OWN.

- **GALFAN COATED**
- **STAINLESS STEEL AVAILABLE ON REQUEST**
